

New Look

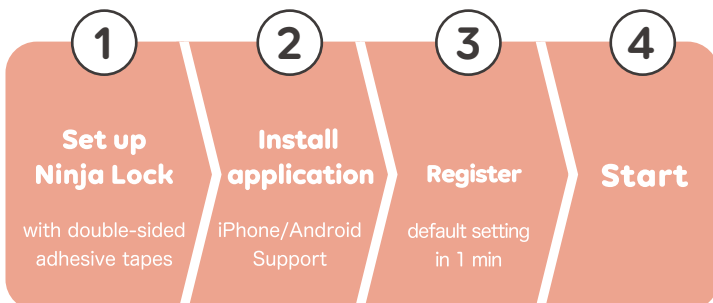

— Sophisticated, totally new smart lock —

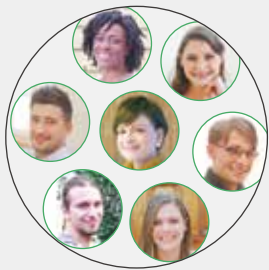

Open doors with Phone

With our simple app, anybody from children to adults can easily use the NinjaLock. The connectivity is now 3 times faster than before.

Four Easy steps

Share access safely

 Share the key safely without concern

As shared access rights in your app are protected with encryption, safety is ensured. Share your digital keys with peace of mind, because you can always in the app delete or adjust the access rights settings of all your keys.

Real-time clock

 Autolock/unlock can be set with integrated clock

Since the NinjaLock has an integrated clock, the door can be opened and closed automatically depending on the time of day.

Safe operation record

 Automatically record all activities

All opening and closing activities of the lock will be recorded and saved, no matter if the door is opened and closed manually or via smartphone.

Adjustable Attachments

 Adjustable and fits any thumb turn

The NinjaLock can be adjusted to various different kinds of thumb turns through its patented, steplessly variable attachment. This allows you to fit the lock securely independent of your thumb turn's size.

One Touch Mount

 Easy installation

Two options to attach the lock to your door: Either with double-sided or a magnetic attachment accessory.

*after Android 4.4 or after iOS 9

Please download the application and use it.
